
Feasibility Study

How to automate processes

Proof of concept & process validation.

When ideas to transform production processes with automation emerge, defining the right concept can be a challenging exercise. It is often necessary to undertake valuable validation steps before embarking on a project to ensure efficiency and success.

By doing so, we:

- Ensure the right concept is in our hands
- Choose the right technologies and suppliers
- Get an accurate picture of the project and investment

Our services at a glance

An investment in the right place

By starting with a feasibility study, you are investing in the right place. Clarifying how the process will be automated, paves the way for successful projects.

At JAG Jakob AG, we are confident that our expertise in mechanical design and software development, makes us the ideal choice to demonstrate concepts and validate automation solutions.

LET US HELP YOUR JOURNEY OF TRANSFORMATION!

- » **Current process analysis**

- » **Proof of concept**

- » **Development of prototype modules**

- » **Production and assembly of unique solutions**

- » **Programming and testing**

- » **Process Tuning and Analysis**
